

# Python Course

## How to use Jupyter notebook

### 1 First Program

```
In [16]: print("First python program")
         print("I love Data Science!")
         print(66+1)
```

```
First python program
I love Data Science!
67
```

### 2 Operators

```
In [17]: # operators.py

print(2 + 1) #add
print(3 - 1) #subtract
print(6 / 2) #float (result of division comes with point)
print(2 * 3) #multiply
print(13 % 2) #remainder

print(6 // 2) #divide (result does not come with a point ".")
print(3**2) #3 power 2
```

```
#Sequence in which Python runs a code 📌
#PEMDAS:
# Parenthesis Exponents Multiply Divide Addition Subtraction
# Left to right sequence for M D & A S
```

```
3
2
3.0
6
1
3
9
```

### 3 Strings

```
In [18]: # print("Hello World")
         # print("Hello I am Tauha Azmat")

         print('Test for single quotes')
         print("Test for double quotes")
```

```
print(''Test for tripple quotes'')
# ''
# ""
# ''''''

print("what's up?")

# Space counts and shows as it is in a string
```

Test for single quotes  
Test for double quotes  
Test for tripple quotes  
what's up?
